

## **CBE ID**

0026

## **Title**

Measure pair - a. Tobacco use prevention for infants, children and adolescents, b. Tobacco use cessation for infants, children and adolescents

## **Endorsement Status**

Endorsement Removed

## **Is Under Review**

No

## **Previous Endorsement Cycle**

Full Year 2012

## **Removal Date**

Mon, 05/07/2012 - 20:00

## **Initial Endorsement**

Sun, 08/09/2009 - 20:00

## **Steward**

Institute for Clinical Systems Improvement

## **1.0 New or Maintenance**

Maintenance

## **1.1 Measure Structure**

Single Measure

## **1.3 Electronic Clinical Quality Measure (eCQM)**

No

## **1.6 Measure Description**

Percentage of patients' charts showing either that there is no tobacco use/exposure or (if a user) that the current use was documented at the most recent clinic visit  
Percentage of patients with documented tobacco use or exposure at the latest visit who also have documentation that their cessation interest was assessed or that they received advice to quit

## **1.7 Measure Type**

Process

## **1.8 Level of Analysis**

Clinician: Individual

## 1.9 Care Setting

Ambulatory Care: Clinic

### 1.14 Numerator

a: Number of patients' charts audited whose current tobacco status is documented in the medical record  
b: Number of tobacco users advised to quit or whose readiness to quit was assessed at the latest visit.

### 1.15 Denominator

a: Total number of patients' charts audited  
b: Total number of tobacco users audited

### Exclusions

a: inclusions: total number of patient charts audited  
exclusions: none. The measure applies to all patients visiting the practice, regardless of age, who have any indication on their charts that they are or may be users of tobacco, or in the case of children that they are regularly exposed to tobacco smoke

b: inclusions: total number of patient charts audited  
exclusions: none. The measure applies to all patients visiting the practice, regardless of age, who have any indication on their charts that they are or may be users of tobacco, or in the case of children that they are regularly exposed to tobacco smoke

### Risk Adjustment

No risk adjustment or risk stratification
