1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The following components of this measure assess the management of urinary incontinence in older adults.

- Discussing Urinary Incontinence. The percentage of Medicare members 65 years of age and older who reported having urine leakage in the past six months and who discussed their urinary leakage problem with a health care provider.

- Treatment of Urinary Incontinence. The percentage of Medicare members 65 years of age and older who reported having urine leakage in the past six months and who treatment options for

their current urine leakage problem.

- Impact of Urinary Incontinence. The percentage of Medicare members 65 years of age and older who reported having urine leakage in the past six months and who reported that urine leakage made them change their daily activities or interfered with their sleep a lot.

1.7 Measure Type

Process

1.8 Level of Analysis

Health Plan, Integrated Delivery System

1.9 Care Setting

Other

1.14 Numerator

1) Discussing Urinary Incontinence: The number of members in denominator 1 who indicated they discussed their urinary incontinence with a health care provider.2) Treatment of Urinary Incontinence: The number of members in denominator 2 who indicated they discussed treatment options for their urinary incontinence with a health care provider.3) Impact of Urinary Incontinence: The number of members in denominator 3 who indicated that urine leakage made them change their daily activities or interfered with their sleep a lot.

1.15 Denominator

1) Discussing Urinary Incontinence: Medicare members 65 years of age and older who reported having any urinary incontinence in the past six months.2) Treatment of Urinary Incontinence: Medicare members 65 years of age and older who reported having any urinary incontinence in the past six months.3) Impact of Urinary Incontinence: Medicare members 65 years of age and older who reported having any urinary incontinence in the past six months.

1.20 Types of Data Sources

Instrument-Based Data

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Exclusions

Patients who did not have a doctor's visit in the last year or who reported they did not have a problem with UI, are excluded.

Planned Use

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Elderly
