1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percentage of patients aged 18 years and older with the diagnosis of community-acquired bacterial pneumonia with oxygen saturation assessed

1.7 Measure Type

Process

1.8 Level of Analysis

Clinician: Individual

1.14 Numerator

Patients with oxygen saturation documented and reviewed Medical record may include one of the

following: physician documentation that oxygen saturation was reviewed, dictation by the physician including oxygen saturation, physician initials in the chart that oxygen saturation was reviewed, or other indication that oxygen saturation had been acknowledged by the physician.

1.15 Denominator

All patients aged 18 years and older with the diagnosis of community-acquired bacterial pneumonia. For purposes of measurement in the emergency department, this measure is intended to include only those patients with an emergency department discharge diagnosis of community-acquired bacterial pneumonia.

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

6.1.3 Current Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

Exclusions

Exclude patients for whom oxygen saturation was not assessed by reason of appropriate denominator exclusion

Risk Adjustment

No risk adjustment or risk stratification
