1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percentage of patients, aged 6-18 years old, treated with psychostimulant medication for the diagnosis of attention deficit hyperactivity disorder (ADHD) whose medical record contains documentation of follow-up visits at least twice a year that include height, weight, a discussion of medication, a discussion of school progress and a care plan.

1.7 Measure Type

Process

1.8 Level of Analysis

Clinician: Group/Practice, Clinician: Individual, Integrated Delivery System

1.9 Care Setting

Outpatient Services

1.14 Numerator

Number of patients, aged 6-18 years, diagnosed with ADHD and prescribed psychostimulant medication whose medical record contains documentation of at least two follow-up visits within a year medication was prescribed and the following components were discussed at each of the visits: height, weight, a discussion of medication, a discussion of school progress and a care plan. Documented is defined as any evidence in the medical record that at least 2 follow-up visits occur in the 12 months since psychostimulant medication prescription date. Each follow-up visit for ADHD includes documentation of the following twice a year: height, weight, a discussion of medication, a discussion of school progress, and a care plan discussion.

1.15 Denominator

Number of patients, aged 6-18 years, diagnosed with ADHD and prescribed a psychostimulant medication in the past 12 months. For this measure, count medication initiation date as the start of a 12-month period.

1.20 Types of Data Sources

Other, Paper Patient Medical Records

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Use unknown

6.1.3 Current Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Use unknown

Exclusions

None.

Planned Use

Public Reporting, Quality Improvement (Internal to the specific organization)

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Children
