Title

Risk-Adjusted Postoperative Renal Failure

Endorsement Status

Endorsement Removed

E&M Committee Rationale/Justification

No longer pursuing endorsement.

Is Under Review

No

Previous Endorsement Cycle

Fall 2018

Removal Date

Sun, 08/31/2025 - 10:49

Initial Endorsement

Tue, 05/08/2007 - 20:00

Steward

The Society of Thoracic Surgeons

1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percent of patients aged 18 years and older undergoing isolated CABG (without pre-existing renal failure) who develop postoperative renal failure or require dialysis

1.7 Measure Type

Outcome

1.8 Level of Analysis

Clinician: Group/Practice, Facility

1.14 Numerator

Number of patients undergoing isolated CABG who develop postoperative renal failure or require dialysis

1.15 Denominator

All patients undergoing isolated CABG

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

6.1.3 Current Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

Exclusions

Patients with documented history of renal failure, baseline serum creatinine of 4.0 or higher; prior renal transplants are not considered preoperative renal failure unless since transplantation their Cr has been or is 4.0 or higher

Risk Adjustment

Statistical risk model

Target Population

Elderly

Use In Federal Program

Medicare Physician Quality Reporting System (PQRS), Physician Feedback/Quality and Resource Use Reports (QRUR), Physician Value-Based Payment Modifier (VBM)
