

**CBE ID**

0120

**Title**

Risk-Adjusted Operative Mortality for Aortic Valve Replacement (AVR)

**Endorsement Status**

Endorsement Removed

**E&M Committee Rationale/Justification**

No longer pursuing endorsement.

**Is Under Review**

No

**Previous Endorsement Cycle**

Fall 2023

**Removal Date**

Sun, 08/31/2025 - 10:49

**Initial Endorsement**

Tue, 05/08/2007 - 20:00

**Steward**

The Society of Thoracic Surgeons

**1.0 New or Maintenance**

Maintenance

**1.1 Measure Structure**

Single Measure

**1.3 Electronic Clinical Quality Measure (eCQM)**

No

**1.6 Measure Description**

Percent of patients aged 18 years and older undergoing Aortic Valve Replacement (AVR) who die, including both 1) all deaths occurring during the hospitalization in which the procedure was performed, even if after 30 days, and 2) those deaths occurring after discharge from the hospital, but within 30 days of the procedure

**1.7 Measure Type**

Outcome

## **1.8 Level of Analysis**

Clinician: Group/Practice, Facility

## **1.13 Data Dictionary**

Not attached. I attest that all information will be provided where codes and/or value sets are needed (1.14a - 1.15c).

## **1.14 Numerator**

Number of patients aged 18 years and older undergoing AVR who die, including both 1) all deaths occurring during the hospitalization in which the operation was performed, even if after 30 days, and 2) those deaths occurring after discharge from the hospital, but within 30 days of the procedure

## **1.15 Denominator**

All patients undergoing isolated AVR surgery

## **6.1.2 Current or Planned Use(s)**

Public Reporting

## **6.1.3 Current Use(s)**

Public Reporting

## **Exclusions**

N/A

## **Risk Adjustment**

Statistical risk model

## **Target Population**

Elderly

## **The measure developer is different from the measure steward**

No

## **Steward Organization**

The Society of Thoracic Surgeons
