1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The percentage of home health episodes of care during which the frequency of the patient's pain when moving around improved.

1.7 Measure Type

Outcome

1.8 Level of Analysis

Facility

1.9 Care Setting

Home Care

1.14 Numerator

The number of home health episodes of care where the value recorded on the discharge assessment indicates less frequent pain at discharge than at start (or resumption) of care.

1.15 Denominator

Number of home health episodes of care ending with a discharge during the reporting period, other than those covered by generic or measure-specific exclusions.

1.20 Types of Data Sources

Electronic Health Data

6.1.2 Current or Planned Use(s)

Public Reporting

6.1.3 Current Use(s)

Public Reporting

Exclusions

All home health episodes where there is no pain reported at the start (or resumption) of care assessment, or the patient is non-responsive, or the episode of care ended in transfer to inpatient facility or death at home, or the episode is covered by one of the generic exclusions.

Measure Disclaimer

NA

Risk Adjustment

Statistical risk model

Target Population

Elderly, Individuals with multiple chronic conditions

Use In Federal Program

Home Health Quality Reporting, Home Health Value-Based Purchasing Program

Steward Organization

Centers for Medicare & Medicaid Services
