1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percentage of residents with a valid target assessment and a valid prior assessment, with a decline in their ability to move about in their room and the adjacent corridor.

1.7 Measure Type

Outcome

1.8 Level of Analysis

Facility

1.9 Care Setting

Nursing Home/Skilled Nursing Facility

1.14 Numerator

Total number of residents whose value for locomotion self-performance is greater at target relative to prior assessment ($G1e(A)[t] > G1e(A)[t-1]$).

1.15 Denominator

All residents with a valid target assessment and a valid prior assessment.

Exclusions

Exclusions:

Residents satisfying any of the following conditions:

1. The $G1e(A)$ value is missing on the target assessment [t].
2. The $G1e(A)$ value is missing on the prior assessment [t-1] and the $G1e(A)$ value shows some dependence on the target assessment ($G1e(A)[t] > 0$).
3. The $G1e(A)$ value on the prior assessment is 4 (total dependence) or 8 (activity did not occur).
4. The resident is comatose ($B1 = 1$) or comatose status is unknown ($B1 = \text{missing}$) on the target assessment.
5. The resident has end-stage disease ($J5c = \text{checked}$) or status is unknown ($J5c = \text{missing}$) on the target assessment.
6. The resident is receiving hospice care ($P1ao = \text{checked}$) or hospice status is unknown ($P1ao = \text{missing}$) on the target assessment or the most recent full assessment.
7. The resident is in a facility with a Chronic Care Admission Sample size of 0 (i.e., there are no admission assessments with $AA8a = 01$ in the facility over the previous 12 months).

Covariates:

1. Indicator of recent falls on the prior assessment:

Covariate = 1 if J4a checked or J4b checked.

Covariate = 0 if J4a not checked AND J4b not checked.

2. Indicator of extensive support or more dependence in eating on the prior assessment:

Covariate = 1 if $G1h(A) = 3, 4, 8$.

Covariate = 0 if $G1h(A) = 0, 1, 2$.

3. Indicator of extensive support or more dependence in toileting on the prior assessment:

Covariate = 1 if $G1i(A) = 3, 4$, or 8.

Covariate = 0 if $G1i(A) = 0, 1$, or 2.
