Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

A self-report outcome measure of functional status for patients 14 years+ with elbow, wrist, hand impairments. The change in functional status assessed using FOTO (elbow, wrist and hand) PROM is adjusted to patient characteristics known to be associated with functional status outcomes (risk adjusted) and used as a performance measure at the patient level, at the individual clinician, and at the clinic level to assess quality.

1.7 Measure Type

Patient-reported Outcome Performance Measure (PRO-PM)

1.8 Level of Analysis

Clinician: Group/Practice, Clinician: Individual, Facility

1.9 Care Setting

Other, Outpatient Services, Post-Acute Care

1.14 Numerator

Patient Level: The residual functional status score for the individual patient (residual scores are the actual change scores - predicted change after risk adjustment). Individual Clinician Level: The average of residuals in functional status scores in patients who were treated by a clinician in a 12 month time period for elbow, wrist and hand impairment. Clinic Level: The average of residuals in functional status scores in patients who were treated by a clinic in a 12 month time period for elbow, wrist and hand impairments.

1.15 Denominator

All patients 14 years and older with elbow, wrist or hand impairments who have initiated rehabilitation treatment and completed the FOTO (elbow, wrist and hand) PROM.

1.20 Types of Data Sources

Electronic Health Data, Instrument-Based Data, Paper Patient Medical Records

6.1.2 Current or Planned Use(s)

Public Reporting

Exclusions

- Patients who are not being treated for an elbow, wrist and/or hand impairment
- <14 years of age

Measure Disclaimer

NA

Planned Use

Public Reporting

Risk Adjustment

Statistical risk model

Target Population

Dual eligible beneficiaries, Elderly, Populations at Risk, Veterans

Use In Federal Program

Medicare Physician Quality Reporting System (PQRS), Physician Feedback/Quality and Resource Use Reports (QRUR), Physician Value-Based Payment Modifier (VBM)
