1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Proportion of infants 22 to 29 weeks gestation treated with surfactant within 2 hours of birth among infants who were treated with surfactant.

1.7 Measure Type

Process

1.8 Level of Analysis

Facility

1.9 Care Setting

Inpatient/Hospital

1.14 Numerator

Number of infants 22 to 29 weeks gestation treated with surfactant within 2 hours of birth

1.15 Denominator

Number of infants 22 to 29 weeks gestation treated with surfactant at any time prior to discharge from the reporting hospital.

1.20 Types of Data Sources

Claims Data, Other, Paper Records, Registry data

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

6.1.3 Current Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Exclusions

1. Infants outside the gestational age range of 22 to 29 weeks.
2. Outborn infants admitted more than 28 days after birth.
3. Outborn infants who have been home prior to admission.
4. Infants not treated with surfactant.

Risk Adjustment

Stratification by risk category/subgroup

Target Population

Children
