1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percentage of episodes with an International Normalized Ratio (INR) test performed three to seven days after a newly started interacting anti-infective medication for individuals receiving warfarin

1.7 Measure Type

Process

1.8 Level of Analysis

Health Plan, Integrated Delivery System, Population: Regional and State

1.9 Care Setting

Outpatient Services

1.14 Numerator

Number of episodes in the denominator with an INR test performed three to seven days after the start date of an anti-infective medication

1.15 Denominator

Number of episodes with a newly started interacting anti-infective medication with an overlapping days' supply of warfarin.

1.20 Types of Data Sources

Claims Data, Electronic Health Data

6.1.2 Current or Planned Use(s)

Not in use

6.1.3 Current Use(s)

Not in use

Exclusions

We excluded the following individuals from the denominator:

- Individuals with a diagnosis of cancer
- Individuals who are monitoring INR at home

Measure Disclaimer

This performance measure does not establish a standard of medical care and has not been tested for all potential applications.

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Elderly, Populations at Risk
