1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The percentage of patients with chronic kidney disease stage 5 and an LDL greater than or equal to 130 mg/dl that have a current refill for a lipid lowering agent.

1.7 Measure Type

Process

1.8 Level of Analysis

Clinician: Group/Practice, Clinician: Individual, Facility, Health Plan, Integrated Delivery System,

Other, Population: Community, County or City, Population: Regional and State

1.9 Care Setting

Ambulatory Care: Clinician Office, Home Care, Inpatient/Hospital, Post-Acute Care

1.14 Numerator

Patients with a current refill for a lipid lowering agent.

1.15 Denominator

All patients, ages 18 and older, diagnosed with chronic kidney disease stage 5, dialysis, or kidney transplant, and an LDL level above 130 mg/dL.

1.20 Types of Data Sources

Claims Data, Electronic Health Data, Electronic Health Records: Electronic Health Records, Instrument-Based Data, Other

6.1.2 Current or Planned Use(s)

Payment Program, Public Reporting, Quality Improvement (Internal to the specific organization)

6.1.3 Current Use(s)

Payment Program, Public Reporting, Quality Improvement (Internal to the specific organization)

Exclusions

Specific Exclusions:

None

General Exclusions:

- Evidence of metastatic disease or active treatment of malignancy (chemotherapy or radiation therapy) in the last 6 months;
- Patients who have been in a skilled nursing facility in the last 3 months
- Patient or provider feedback indicating allergy or intolerance to the drug in the past
- Patient or provider feedback indicating that there is a contraindication to adding the drug

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Elderly
