1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Patient(s) with a recent emergency room encounter for a transient cerebral ischemic event that had any physician visit within 14 days of the acute event.

1.7 Measure Type

Process

1.8 Level of Analysis

Clinician: Group/Practice, Clinician: Individual, Facility, Health Plan, Integrated Delivery System,

Other, Population: Community, County or City, Population: Regional and State

1.9 Care Setting

Urgent Care - Ambulatory, Ambulatory Care: Clinician Office, Inpatient/Hospital, Post Acute/Long Term Care Facility: Rehabilitation, Post-Acute Care

1.14 Numerator

Create a POST period from the day after the initiating Facility Event (i.e., the ER encounter for the transient cerebral ischemic event) through 14 days after the initiating Facility Event. During the POST period, did the patient have any professional encounter (code set PR0107, RV0107) with any diagnosis (Note: Will allow non-physician encounters (e.g., nurse practitioner and physician assistance encounters) to count toward numerator compliance as long as the provider(s) has submitted one of the face-to-face encounter codes (e.g., 99213) listed in our code set.) Time Window: 30 days after the initiating encounter (i.e., ER encounter for transient cerebral ischemia)

1.15 Denominator

For condition confirmation, patients must meet the following criteria: 1. All males or females that are 18 years or older at the end of the report period. 2. Patient must have been continuously enrolled: Medical benefits throughout the 12 months prior to the end of the report period AND Pharmacy benefit plan for 6 months prior to the end of the report period. Note: The standard enrollment break logic allows unlimited breaks of no more than 45 days and no breaks greater than 45 days. 3. Either one of the following (A or B): A. The patient is listed on the Disease Registry Input File for this condition, if a Disease Registry Input File is available. Note: Disease Registry is NOT a required input file. B. During the 24 months prior to the end of the report period, patient has 2 or more that are at least 14 days apart of the following services, where the diagnosis is Occlusive Vascular Disease OR Stroke, non-hemorrhagic OR Transient cerebral ischemia (code set DX0110, DX0146, DX0149): • Professional Encounter (code set PR0107, RV0107) • Professional Supervision (code set PR0108) • Facility Event - Confinement/Admission • Facility Event - Emergency Room • Facility Event - Outpatient Surgery. In addition, for this measure, the patient must meet the following criteria: Create multiple temporary events for transient cerebral ischemic event. Set Episode Start Date to the date of service of any claim (i.e. initiating event) for the service and diagnosis stated below during the following window of time: 365 days prior to the end of the report period through 30 days prior to the end of the report period. Facility Event - Emergency Room AND The primary diagnosis on the claim was: Transient cerebral ischemia (code set DX0149). Time Window: 365 days prior to the end of the report period through 30 days prior to the end of the report period.

1.20 Types of Data Sources

Claims Data

6.1.2 Current or Planned Use(s)

Payment Program, Professional Certification or Recognition Program, Public Reporting, Quality Improvement (Internal to the specific organization), Regulatory and Accreditation Programs

6.1.3 Current Use(s)

Payment Program, Professional Certification or Recognition Program, Public Reporting, Quality

Improvement (Internal to the specific organization), Regulatory and Accreditation Programs

Exclusions

None

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Elderly
