Title

Operative Mortality Stratified by the 5 STAT Mortality Categories

Project

Surgery

Endorsement Status

Endorsed

Is Under Review

No

Next Maintenance Cycle

Fall 2026

Previous Endorsement Cycle

Spring 2019

Initial Endorsement

Fri, 11/18/2011 - 06:34

Steward

The Society of Thoracic Surgeons

1.0 New or Maintenance

Maintenance

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percent of patients undergoing index pediatric and/or congenital heart surgery who die, including both 1) all deaths occurring during the hospitalization in which the procedure was performed, even if after 30 days (including patients transferred to other acute care facilities), and 2) those deaths occurring after discharge from the hospital, but within 30 days of the procedure, stratified by the five STAT Mortality Categories, a multi-institutional validated risk stratification tool

1.7 Measure Type

Outcome

1.8 Level of Analysis

Clinician: Group/Practice

1.9 Care Setting

Inpatient/Hospital

1.14 Numerator

Number of patients undergoing index pediatric and/or congenital heart surgery who die, including both 1) all deaths occurring during the hospitalization in which the procedure was performed, even if after 30 days (including patients transferred to other acute care facilities), and 2) those deaths occurring after discharge from the hospital, but within 30 days of the procedure, stratified by the five STAT Mortality Levels, a multi-institutional validated complexity stratification tool

1.15 Denominator

All patients undergoing index pediatric and/or congenital heart surgery

1.20 Types of Data Sources

Registry data

6.1.2 Current or Planned Use(s)

Public Reporting

6.1.3 Current Use(s)

Public Reporting

Exclusions

N/A

Risk Adjustment

Stratification by risk category/subgroup

Target Population

Children, Individuals with multiple chronic conditions
