1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

A reliability adjusted measure of Esophagectomy surgical performance that optimally combines two important domains: Esophagectomy hospital volume and Esophagectomy operative mortality, to provide predictions on hospital Esophagectomy survival rates in patients age 18 and over.

1.7 Measure Type

Outcome

1.8 Level of Analysis

Facility

1.14 Numerator

Outcome: Survival of esophageal cancer patients age 18 and over who undergo an esophagectomy. Time Window = during the hospital admission

1.15 Denominator

Included Population: All hospital patients age 18 and over with esophageal cancer who had an esophagectomy. Time Window = 12 months

Exclusions

Patients without a diagnosis of esophageal cancer

Target Population

Elderly
