Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Risk adjusted, case mix adjusted urinary tract infection outcome measure of adults 18+ years after surgical procedure.

1.7 Measure Type

Outcome

1.8 Level of Analysis

Facility

1.14 Numerator

The outcome of interest is a hospital-specific assessment of risk-adjusted Urinary Tract Infection

(UTI: as defined by American College of Surgeons National Surgical Quality Improvement Program (ACS NSQIP) defined below) within 30 days of any listed (CPT) surgical procedure: the list of eligible CPT codes is attached separately.

1.15 Denominator

Patients undergoing any of the listed (CPT) surgical procedures- list is attached separately. Specifically excluded are certain CPTs involving the urinary tract (excluded: 50220, 50545, 50400, 50205, 51040, 54640, 53852, 55866, 52450, 52234). See attached submitted list of eligible CPT codes.

1.20 Types of Data Sources

Other

Exclusions

Major trauma and transplant surgeries are excluded as are surgeries not on the supplied CPT list as eligible for selection. Patients who are ASA 6 (brain-death organ donor) are not eligible surgical cases.

A patient who has a second surgical procedure performed within 30 days after an index procedure cannot be accrued into the measure as a new (second) index procedure since the measure is based on 30 day outcomes.
