Title

Developmental screening using a parent completed screening tool (Parent report, Children 0-5)

Project

Health and Well Being Endorsement Maintenance

Endorsement Status

Endorsement Removed

Is Under Review

No

Previous Endorsement Cycle

Full Year 2014

Removal Date

Tue, 09/01/2015 - 20:00

Initial Endorsement

Mon, 08/15/2011 - 04:27

1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The measure assesses whether the parent or caregiver completed a developmental screening tool meant to identify children at-risk for developmental, behavioral and social delays. Developmental screening is defined as a standardized tool that assesses the child's risk for developmental, behavioral and social delays. The American Academy of Pediatrics recommends standardized screening using an approved screening tool as the best method of identifying children at risk for developmental, behavioral and/or social delays.

The items assessing developmental screening in the National Survey of Children's Health are meant to assess whether the parent or caregiver completed a standardized developmental

screening tool. The items are age-specific and anchored to parent-completed tools (a majority of health care providers implementing the Bright Futures recommendations for standardized screening for all children utilize parent-completed tools due to their validity and feasibility). The age-specific items assess whether children 10-71 months are screened.

1.7 Measure Type

Process

1.8 Level of Analysis

Other, Population: Regional and State

1.9 Care Setting

Other

1.14 Numerator

Percentage of children whose parents completed a standardized developmental screening tool to identify children at risk for developmental, behavioral, and social delays at a health care visit during the previous 12 months

1.15 Denominator

Children age 10 months - 5 years (71 months) with a health care visit in the past 12 months (see 2a.8 below for further definition of "health care visit")

1.20 Types of Data Sources

Instrument-Based Data

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

6.1.3 Current Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

Exclusions

Child excluded from denominator if age is less than 10 months or more than 5 years and did not have at least one health care visit in the past 12 months

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Children
