Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The percentage of individuals 65 years and older with dementia who are receiving an antipsychotic medication without evidence of a psychotic disorder or related condition.

A lower rate indicates better performance.

Other

1.13 Data Dictionary

Not attached. I attest that all information will be provided where codes and/or value sets are needed (1.14a - 1.15c).

1.14 Numerator

The number of individuals from the denominator who had one or more prescription claims and more than 30 days' supply for any antipsychotic medication AND do not have a diagnosis of schizophrenia, bipolar disorder, Huntington's disease or Tourette's Syndrome during the measurement year.

1.15 Denominator

Individuals 65 years and older as of the first day of the measurement year, meeting continuous enrollment criteria (the measurement year, with one allowable gap), and with at least one of the following during the measurement year: • Dementia diagnosis • Two or more prescription claims and more than 60 days' supply for a cholinesterase inhibitor or NMDA receptor antagonist.

1.20 Types of Data Sources

Claims Data

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

Exclusions

N/A

Planned Use

Public Reporting, Quality Improvement (Internal to the specific organization)

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Elderly

The measure developer is different from the measure steward

Yes
