Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The percentage of patients 18-75 years of age with a serious mental illness and diabetes (type 1 and type 2) who had hemoglobin A1c (HbA1c) testing during the measurement year.

Note: This measure is adapted from an existing health plan measure used in a variety of reporting programs for the general population (NQF #0057: Comprehensive Diabetes Care: Hemoglobin A1c (HbA1c) Testing). This measure is endorsed by NQF and is stewarded by NCQA.

1.7 Measure Type

Process

1.8 Level of Analysis

Health Plan

1.9 Care Setting

Outpatient Services

1.14 Numerator

Patients who had Hemoglobin A1c (HbA1c) testing during the measurement year.

1.15 Denominator

Patients 18-75 years of age as of December 31 of the measurement year with at least one acute inpatient visit or two outpatient visits for schizophrenia or bipolar I disorder, or at least one inpatient visit for major depression during the measurement year AND diabetes (type 1 and type 2) during the measurement year or year before.

1.20 Types of Data Sources

Claims Data, Electronic Health Data, Electronic Health Records: Electronic Health Records, Paper Patient Medical Records

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Exclusions

Patients who do not have a diagnosis of diabetes and meet one of the following criteria are excluded from the measure:

- Patients with a diagnosis of polycystic ovaries.
- Patients with gestational or steroid-induced diabetes.

Measure Disclaimer

These performance measures are not clinical guidelines and do not establish a standard of medical care, and have not been tested for all potential applications.

THE MEASURES AND SPECIFICATIONS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND.

Planned Use

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Dual eligible beneficiaries, Individuals with multiple chronic conditions, Populations at Risk
