Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The percentage of patients 18-75 years of age with a serious mental illness and diabetes (type 1 and type 2) whose most recent blood pressure (BP) reading during the measurement year is <140/90 mm Hg.

Note: This measure is adapted from an existing health plan measure used in a variety of reporting programs for the general population (NQF #0061: Comprehensive Diabetes Care: Blood Pressure Control <140/90 mm Hg) which is endorsed by NQF and is stewarded by NCQA.

1.7 Measure Type

Outcome

1.8 Level of Analysis

Health Plan

1.9 Care Setting

Outpatient Services

1.14 Numerator

Patients whose most recent BP reading is less than 140/90 mm Hg during the measurement year. This intermediate outcome is a result of blood pressure control (<140/90 mm Hg). Blood pressure control reduce the risk of cardiovascular diseases. There is no need for risk adjustment for this intermediate outcome measure.

1.15 Denominator

All patients 18-75 years of age as of December 31 of the measurement year with at least one acute inpatient visit or two outpatient visits for schizophrenia or bipolar I disorder, or at least one inpatient visit for major depression during the measurement year AND diabetes (type 1 and type 2) during the measurement year or year prior to the measurement year.

1.20 Types of Data Sources

Claims Data, Electronic Health Data, Electronic Health Records: Electronic Health Records, Paper Patient Medical Records

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Exclusions

Patients who do not have a diagnosis of diabetes and meet one of the following criteria may be excluded from the measure:

- Patients with a diagnosis of polycystic ovaries.
- Patients with gestational or steroid-induced diabetes.

Measure Disclaimer

These performance measures are not clinical guidelines and do not establish a standard of medical care, and have not been tested for all potential applications.

THE MEASURES AND SPECIFICATIONS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND.

Planned Use

Public Reporting, Quality Improvement (Internal to the specific organization), Quality

Improvement with Benchmarking (external benchmarking to multiple organizations)

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Dual eligible beneficiaries, Individuals with multiple chronic conditions, Populations at Risk
