**1.1 Measure Structure**

Single Measure

**1.6 Measure Description**

The Risk Adjusted Post-Ambulance Provider Triage Emergency Department (ED) Visit Rate Measure (shorthand: Post-Triage ED Visit Rate Measure) assesses the quality of the triage and decision making by ambulance providers who transport low acuity patients to an alternative destination (non-ED location), or facilitate Treatment In Place (TIP), by identifying whether patients have a subsequent ED visit or death within three days.

**1.7 Measure Type**

Outcome

**1.9 Care Setting**

Other

**1.14 Numerator**

---

The outcome for this measure is an ED visit or death within three days for patients who have been triaged by an ambulance provider to an alternative non-ED destination or treated in place (TAD/TIP).

### **1.15 Denominator**

The cohort, or denominator, includes patients age 18 or older who have an encounter with an ambulance provider whose triage decision is to either transport them to an alternative non-ED destination (i.e., TAD) or to initiate and facilitate TIP.
