# Using the Zoom Platform

The screenshot shows a Zoom meeting interface. At the top, there are two video thumbnails: 'Host' on the left and 'Attendee 2' on the right, with a yellow border around the latter. Below these is a large 'Attendee' video thumbnail. At the bottom, there is a toolbar with various icons. Three numbered callouts are present: '1' is a white circle with a black border pointing to the bottom toolbar; '2' is a white circle with a black border pointing to the 'Participants' button; '3' is a white circle with a black border pointing to the 'Reactions' icon in the bottom toolbar. On the right side of the screenshot, there is a 'Participants (3)' panel listing 'Attendee 2 (Me)', 'Host (Host)', and 'Attendee'. Below this is a 'Chat' panel with a 'Who can see your messages?' dropdown and a 'Type message here...' input field.

- 1 Click the lower part of your screen to mute/unmute, start, or pause video
- 2 Click on the participant or chat button to access the full participant list or the chat box
- 3 To raise your hand, select the raised hand function under the reactions tab

# Using the Zoom Platform (Phone View)

# PRMR Process

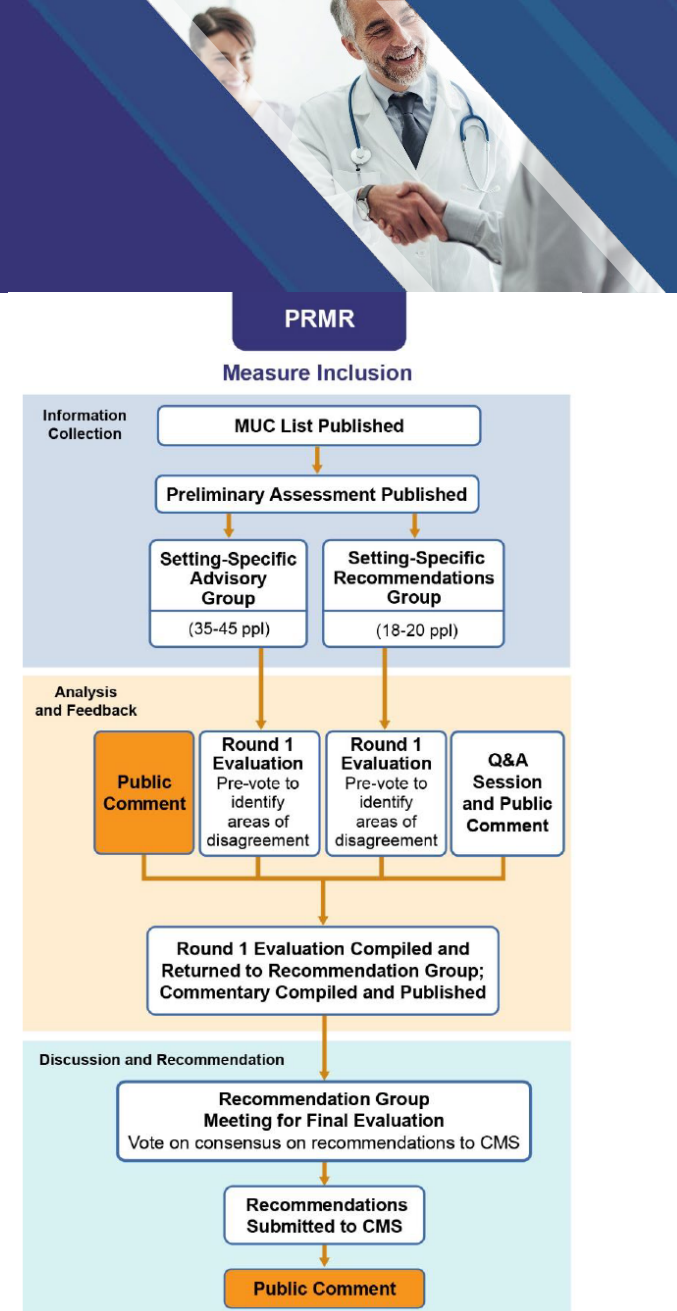

# PRMR Process

The PRMR process builds consensus regarding MUC list measures as to whether they are appropriate for consideration for CMS quality reporting programs and value-based programs

Three major phases:

1. Information collection
2. Analysis and feedback
3. Discussion and recommendation

# PRMR Process: Analysis and Feedback

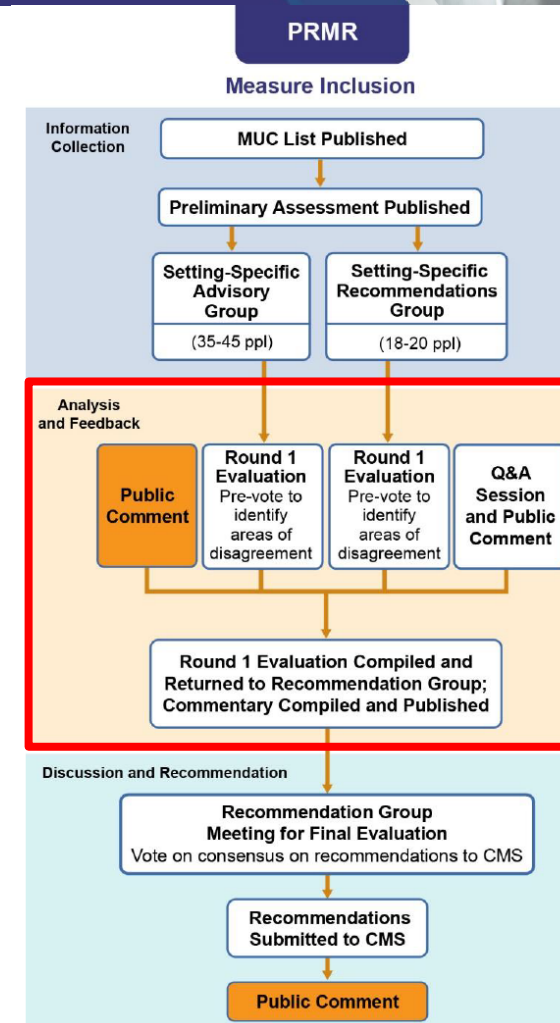

## • Round One Evaluation

- Advisory group and recommendation group members review PAs. They submit initial ratings on the measures with explanations.
- Ratings are used to determine areas of non-consensus. This helps focus discussion during the recommendation group meeting.

## • Public Comment and Listening Sessions

- A 21-day call for public comment occurs with the MUC list release.
- PQM will host three public listening sessions, one per setting, where CMS, Battelle staff, and measure developers/stewards address questions.
- Comments received through the comment process and during listening sessions will be made publicly available on the PQM website.

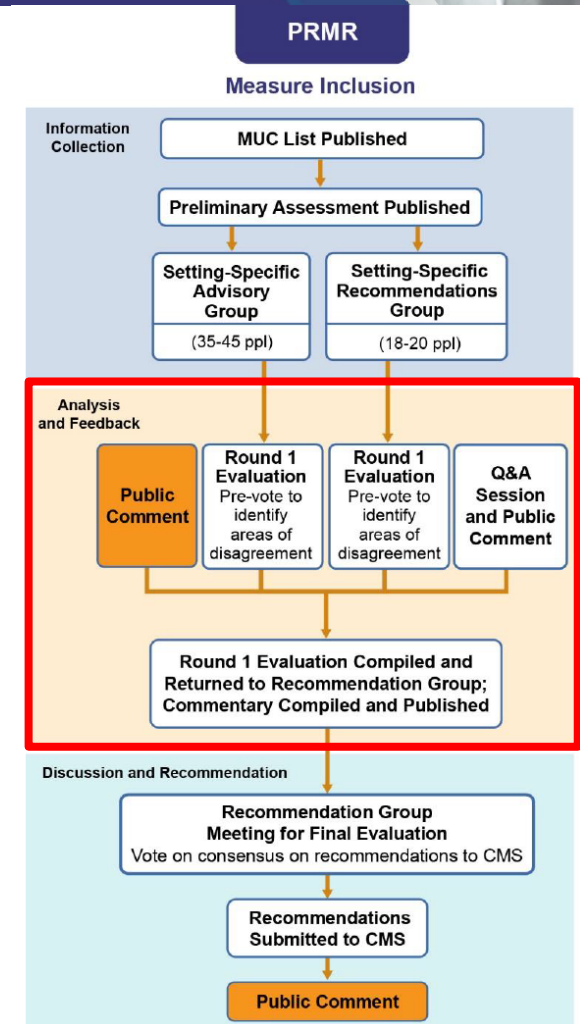

# PRMR Process: Analysis and Feedback

(cont.)

- Information collected from the public comment process, listening sessions, and written feedback from PRMR groups is compiled and synthesized.
  - Round One Evaluations are used to identify areas of non-consensus. Areas of non-consensus are emphasized in the recommendation group meetings for final evaluation agenda.
  - Feedback from the advisory groups and recommendation groups, along with public comments, are provided to the recommendation groups to consider as they vote.

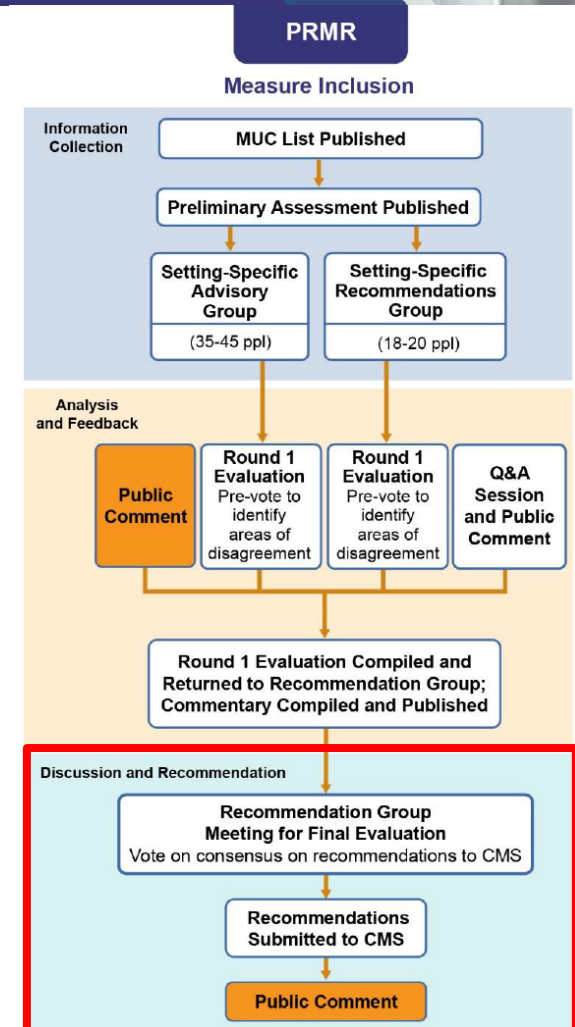

# PRMR Process: Discussion and Recommendation

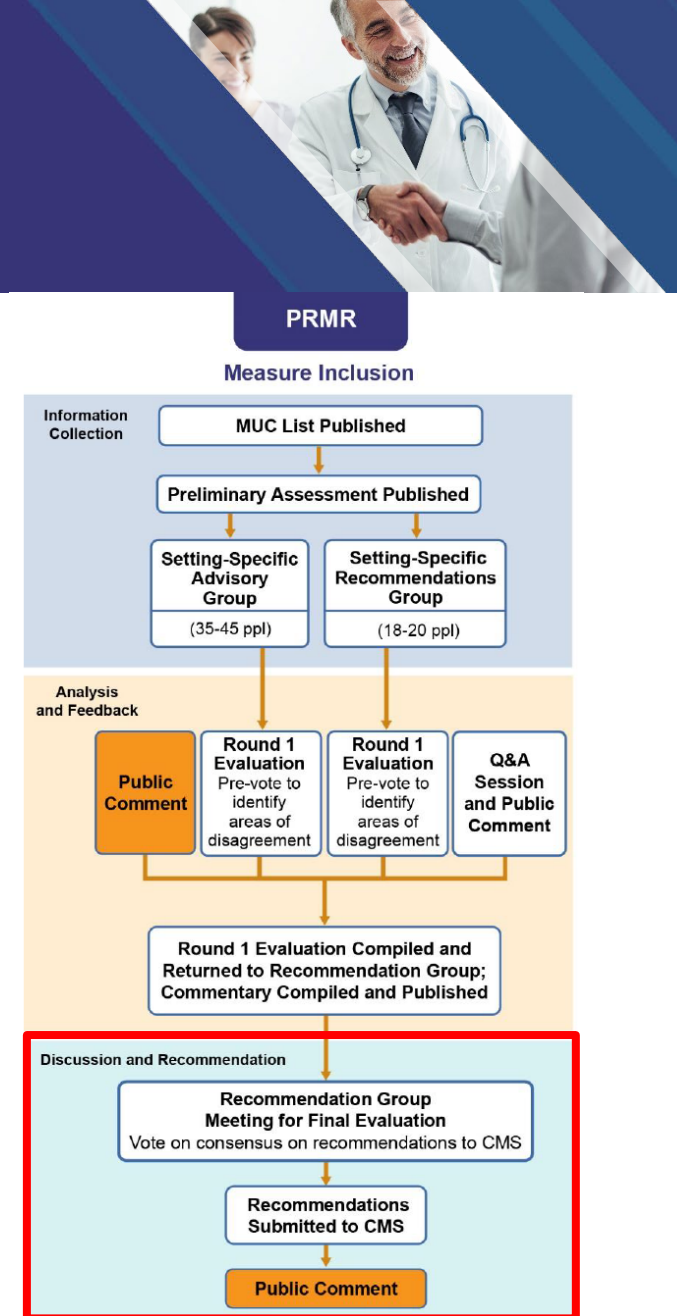

## Recommendation Group Meeting for Final Evaluation

- In January, the recommendation groups meet to discuss issues/concerns raised during the public comment period and feedback from the advisory groups.
- The meeting agenda prioritizes areas of non-consensus identified in the analysis and feedback phase.
- The recommendation group meetings for final evaluation involves:
  - An efficient iterative voting process to ensure a meaningful approach for making final recommendations
  - Trained facilitators and committee-selected lead discussants
- Recommendations from the meeting are submitted to CMS.

# PRMR Process: Discussion and Recommendation (cont.)

- Final recommendations from the recommendation group are published February 1 on the [PQM website](#).
- There is a 15-day second public comment period.
- The intent of this comment opportunity is to provide additional feedback on MUC and the final recommendations to CMS.

# CAHPS Hospice Survey Measure

Begins at 2:10 pm ET

# MUC2023-183 CAHPS Hospice Survey-Care Preferences

- **Measure Steward:** CMS
- **Brief Description of Measure:**
  - Care Preferences is a multi-item measure derived from the CAHPS Hospice Survey, Version 9.0, a 39-item standardized questionnaire and data collection methodology. The survey is intended to measure the care experiences of hospice decedents and their primary caregivers. The Care Preferences measure is composed of responses that address the care team's effort to listen to the things that mattered most to the patient/family and provision of care that respected patient wishes.

# MUC2023-191 CAHPS Hospice Survey Hospice Team Communication

- **Measure Steward:** CMS

- **Brief Description of Measure:**

- Hospice Team Communication is a multi-item measure derived from the CAHPS Hospice Survey, Version 9.0, a 39-item standardized questionnaire and data collection methodology. The survey is intended to measure the care experiences of hospice decedents and their primary caregivers. The Hospice Team Communication measure is composed of responses to the following five Hospice Team Communication focused survey items.
  - How often did the hospice team let you know when they would arrive to care for your family member?
  - How often did the hospice team explain things in a way that was easy to understand?
  - How often did the hospice team keep you informed about your family member’s condition?
  - How often did the hospice team listen carefully to you when you talked with them about problems with your family member’s hospice care?
  - While your family member was in hospice care, how often did the hospice team listen carefully to you?
