

## Important:

Components do not need to be completed sequentially.

The clinician can complete the observations in any order needed.

Numerator = 3

Eligible Occurrence = 4

Score = 3/4 = 75%

## Process Mapping at the Encounter Level

Reporting Period CY 2025 / Submission Period CY 2026 / Payment Period FY 2027

Eliaible Occurrence = 2

Score = 2/2 = 100%

## **GMCS Calculations:**

1. Observation Score is 0 if not documented, 1 if documented

Inpatient

Admission

Is the patient 18

years of age or

older, with LOS 24

Eliaible Occurrence = 4

Score = 0/4 = 0%

- 2. Total Malnutrition Components Score = Observation 1 + Observation 2 + Observation 3 + Observation 4
- 3. Total Malnutrition Composite Score as Percentage = <u>Total Malnutrition Components Score</u> x 100

Eliaible Occurrence = 1

Score = 1/1 = 100%

Does not

meet

criteria

No

Eligible Occurrence

4. Aggregate Total Malnutrition Composite Score as Percentage = <u>Average Total Malnutrition Components Score</u> x 10

# of Eligible Hospitalizations\* in the Measure Population

Eliaible Occurrence = 2

Score = 1/2 = 50%

\*Eligible Hospitalizations are those classified as Inpatient encounters, that are 18 years of age or older on admission, with a length of stay of 24 hours or more

Observation #4

Care Plan performed

and documented by

Numerator =2

Eliaible Occurrence = 4

Score = 2/4 = 50%

No

Yes
