CBE 0133 *In-Hospital Risk Standardized Mortality for Percutaneous Coronary Intervention (excluding cardiogenic shock and cardiac arrest)*

- Calibration and discrimination (4.4.5)
  - Table 13
  - Figure 7

Table 13. C-Statistics Results

	Development	Validation
Sample, n	326,561	327,566
Mortality rate	0.8375	0.8649
Discrimination		
C-statistic	0.8851	0.8836
Adjusted R-square	0.2393	0.2329
Predictive Ability		
Lowest Decile	0.0003	0.0003
Highest Decile	0.0553	0.0567

Figure 7. Risk decile plot in the all-patients cohort excluding cardiac arrest or cardiogenic shock

Overall Cohort

- Calibration and discrimination testing results (4.4.5a)
 - Figures 8, 9 and 10

Figure 8. Calibration Curve

Figure 9. Adjusted Distribution of Mortality
