

Full Measure Submission to Partnership for Quality Measurement

Scientific Acceptability

Validity

Provide the statistical results from validity testing for each level of validity testing conducted.*

Exhibit 5. Measure Score Face Validity Results for the Question: *For the HCBS ACSC measure, the denominator will include participants covered under Medicaid who receive HCBS and are aged 18 years and older during the measurement period. The initial population of the Ambulatory Care Sensitive Conditions for Medicaid HCBS Participants measure should include all adults receiving Medicaid HCBS other than those for whom an exclusion is present (i.e., admissions for obstetric diagnoses, admissions associated with hospice care, or transfers to another hospital providing acute care services).*

Response Option	Response (%)	Response (#)
Strongly Agree	50.0%	5
Agree	30.0%	3
Undecided	10.0%	1
Disagree	0.0%	0
Strongly Disagree	10.0%	1
No Not Know or Not Applicable	0.0%	0

Exhibit 6. Measure Score Face Validity Results for the Question: *Should individuals included in the measure's denominator be aged 18 years and older?*

Response Option	Response (%)	Response (#)
No	10.0%	1
Not Sure/Don't Know	40.0%	4
Yes	50.0%	5
