Colo:

C-statistic: 0.636 indicating moderate model discrimination (Optimism corrected c-statistic 0.635)

Hosmer-Lemeshow: Value=11.59 (8DF), p-value 0.1705. Because the pvalue is >0.05 there is NOT evidence to say they observed/expected rates are different, passing calibration testing

Hyst:

C-statistic: 0.627 indicating moderate model discrimination (Optimism Corrected c-statistic 0.624).

Hosmer-Lemeshow: Value=13.32 (8DF), p-value 0.1014. Because the pvalue is >0.05 there is NOT evidence to say they observed/expected rates are different, passing calibration testing
