

Endorsement and Maintenance (E&M) Management of Acute Events and Chronic Conditions Roster

Draft for Public Comment

July 2025

Prepared by:

Battelle

505 King Avenue, Columbus, Ohio 43201

Introduction

The Endorsement and Maintenance (E&M) process is conducted biannually in the fall and spring to review and make endorsement decisions on submitted measures.

Measures undergoing endorsement review are organized into five projects: Primary Prevention; Initial Recognition and Management; Management of Acute Events, Chronic Disease, Surgery, and Behavioral Health; Advanced Illness and Post-Acute Care; and Cost and Efficiency.

Project committees are divided into an Advisory Group (35-40 people) and a Recommendation Group (20-25 people). The Advisory Group provides feedback and questions about the measures under review before the Recommendation Groups render final endorsement decisions.

Committee members are appointed to a 3-year term and will serve on both the Advisory and Recommendation Groups throughout their tenure. The Advisory and Recommendation Group assignments in this roster apply to the Fall 2025 and Spring 2026 cycles.

Please note, only individual members—and not organizational members—serve on E&M projects. Individual members represent their own perspective and experience.
