The analyses upon which this publication is based were performed under Contract Number 75FCMC23C0010, entitled, "National Consensus Development and Strategic Planning for Health Care Quality Measurement," sponsored by the Department of Health and Human Services, Centers for Medicare & Medicaid Services. *Restricted:* Use, duplication, or disclosure is subject to the restrictions as stated in Contract Number 75FCMC23C0010 between the Government and Battelle.

## Introduction

The Pre-Rulemaking Measure Review (PRMR) process is conducted annually to provide recommendations to the Department of Health and Human Services (HHS) Centers for Medicare & Medicaid Services (CMS) on the selection of quality and efficiency measures under consideration for use in select CMS programs.

Measures for review are organized into three setting-specific committees: Clinician; Hospital; and Post-Acute Care/Long-Term Care (PAC/LTC).

Committees are divided into an Advisory Group (30-35 people) and a Recommendation Group (25-30 people). The Advisory Group provides feedback and questions about the measures under review that help guide Recommendation Group discussion. Based on that input, as well as public comments, the Recommendation Group renders final recommendations to CMS about which measures should be selected for use.

Please note, PRMR members may be organizational or individual members. Organizational members represent their organization's interest while serving on the committee while an individual member represents their own perspective and experience.

Nominees provide their biographies, which Battelle then edits for grammar and style and summarizes using AI. Battelle staff conducted final reviews.

Learn more about membership types and roster categories in the [Guidebook of Policies and Procedures for Pre-Rulemaking Measure Review \(PRMR\) and Measure Set Review \(MSR\)](#).
