

CBE 0369: Standardized Mortality Ratio for Dialysis Facilities

5.1.3 Characteristics of Measured Entities

5.1.3 Characteristics of Measured Entities*

Describe characteristics of measured entities included in the analysis (e.g., number, size, location, type). If you used a sample, describe how you selected measured entities for inclusion in the sample and the representativeness of the sample.

For each year of the four years from 2020-2023 there were 7,999, 8,108, 8,099, and 7,979 facilities, respectively.

Year	Total Facilities	Total Patients	Median Patients Per Facility
2020*	7,999	502,558	62
2021	8,108	498,815	61
2022	8,099	481,860	60
2023	7,979	470,402	60

*The CMS COVID Extraordinary Circumstances Exception (ECE) data policy restricts the use of claims data from March-June 2020.
