

6.2.4 Progress on Improvement

CBE ID 5598, Standardized Modality Switch Ratio for Incident Dialysis Patients (SMoSR)

| Year | Patients | Patient-years at risk | Switches | Switch rate per 100 patients |
|-------------|-----------------|------------------------------|-----------------|-------------------------------------|
| 2021 | 115,862 | 82,006.98 | 10,355 | 8.94 |
| 2022 | 111,076 | 78,770.52 | 9,950 | 8.96 |
| 2023 | 108,593 | 78,001.40 | 9,753 | 8.98 |

The SMoSR measure was only recently added into DFCC in October 2024 and so there has been limited time to assess any progress on improvement. Due to the three year time-frame of the measure, we are only able to report sequential years from *before* the measure was publicly reported.
