

Table 1 Performance Scores by Decile

Enter overall mean, minimum, and maximum performance scores, along with the count of measured entities and persons/encounters/episodes. Organize entities into deciles by performance scores from 1 (low scores) to 10 (high scores), noting that "high" refers to magnitude, not quality. Provide mean performance scores, number of entities (total) and number of persons/encounters/episodes (total) for entities assigned to each decile. Note that measures being submitted for maintenance review are expected to report on the performance gap, while measures submitted for initial endorsement may provide this information, if available.
