

**Hemodialysis Adequacy****CPM IIIb: Minimum Delivered Hemodialysis Dose**

Numerator: Number of patients in the denominator whose delivered dose of hemodialysis (calculated from last measurements of the month using the UKM or Daugirdas II formula) was a  $\text{spKt/V} > 1.2$  during the study period

Denominator: All adult HD patients ( $\geq 18$  years old) in the sample for analysis who have been on hemodialysis for 90 days or more and dialyzing thrice weekly and whose RRF is unmeasured or whose  $\text{RRF} < 2 \text{ ml/min/1.73m}^2$  (if measured in the last 3 months)

Exclusion: Pediatric patients, peritoneal dialysis patients, acute HD, transient dialysis patients ( $< 30$  days in this center), kidney transplant patients, patients with ESRD less than 90 days, patients whose  $\text{RRF} > 2 \text{ ml/min/1.73m}^2$  (if measured in the last 3 months), patients not on 3x/wk HC
