CPM III: Measurement of Serum Calcium

Numerator: Number of adult dialysis patients included in denominator with serum calcium measured at least once within the study measurement period. Study measurement periods are 1 month for in-unit HD for a total 3-month study period and 2 months for PD and home HD for a total 6-month study period.

Denominator: All adult (≥ 18 years old) peritoneal dialysis and hemodialysis patients included in the sample for analysis.

Exclusions: Transient dialysis patients (in this center < 30 days), acute HD, pediatric patients and kidney transplant patients.
